

AAMRO AVIATION NEWSLETTER

THIRD EDITION: MAY 2025

Muralidharan Nair
CEO / Managing Director

MESSAGE FROM CEO

This is the story of a teenager who, after finishing high school, sat with his mother on the steps in front of their house. Financial difficulties were always a concern at home, despite having a steady income. This was primarily due to the teenager's father spending more on drinks than on his family, which made it quite evident how much his mother struggled to make ends meet.

One day, while his mother was sitting on the steps in tears, he joined her. In an attempt to comfort her, he reassured her not to worry, promising that he would grow up, get a job, and that she wouldn't have to be sad ever again. He also mentioned that, in addition to the job, he would start a business and become a wealthy man. If it were any other mother, she might have laughed at him, but his mother was serious and expressed her full faith in him,

declaring that he was the only hope the family had. He confided in her that all his classmates ridiculed him when he told his teacher that he wished to be a pilot. His inspiration came from his uncle, his father's brother, who worked as a flight engineer with Air India. Whenever his uncle was in town, all his questions revolved around planes and the places he flew to, among other things.

Time flew, years passed, and this teenager ultimately became a millionaire and fulfilled his promise to his mother. As they say, behind every (not so) great man, there is a woman; his wife, a great source of support, and after their marriage, everything he did was to impress her. She was indeed a soulmate. Since they married early, they both became parents to two lovely girls. His girls grew up, and once both of them were married off, the protagonist of our story told his wife and daughters that he wanted to be a pilot.

They were all surprised as he was 58 years old. His resolve brought him to South Florida, where he started his initial training at a flight school in Boca Raton. During his training, being the businessman that he is, he decided to start a flying school, Aamro Aviation Corp, and he was the first student from the school to get his PPL. The rest is history. No prizes for guessing who the protagonist of our story is.

”

If you have passion, perseverance, hard work (smart work), honesty, integrity, and self-belief, one can always achieve one's goals.

”

Greetings and best wishes to all the students and the Aamro Team; you are the future, and together we can make AAMRO even greater.

God bless you all.

SUCCESS STORIES: CELEBRATING OUR LATEST ACHIEVEMENTS

At Aamro Aviation, we celebrate the remarkable achievements of our students as they clear their checkrides this month.

COMMERCIAL PILOT

Congratulations to Matt on passing his Commercial Multi check ride!

Congratulations to Aamro's own Cole Bates on passing his Commercial Pilot checkride!

Congratulations to Lillian Carver on passing her Commercial pilot checkride!

Congratulations to Arya Prasad! Commercial checkride passed!

COMMERCIAL PILOT

Congratulations to Jordan Wragg for passing your Commercial Pilot checkride!

Congratulations to Stephen Lee on passing your Commercial checkride!

Congratulations to Bryant Vucich on passing your Commercial checkride!

PRIVATE PILOT

Congratulations Arthur on passing your Private Pilot checkride!

Congratulations to Brett Steel on passing your Private Pilot checkride!

INSTRUMENT RATING

Congratulations Gio Grant on getting your instrument rating!

FIRST SOLO ACHIEVEMENTS

Congratulations to Juan on his first solo!

Congratulations Gavin on your first solo!

CREW CORNER

— Ryan Lally

About the Author

Ryan Lally is a Certified Flight Instructor based at Palm Beach County Park Airport (KLNA). With extensive experience training pilots in Southeast Florida's airspace, Ryan specializes in helping students develop safe flying skills and aviation knowledge from initial training through advanced certifications.

Some moments change your life in ways you never expected. For me, that moment happened inside an Airbus A320 simulator.

A close friend of mine, a commercial pilot, invited me to experience what it's like to fly a commercial airliner. I had always been curious about aviation, but stepping into that simulator was something entirely different. Surrounded by panels of buttons, switches, and glowing screens, I felt like I was entering a new world — one built on precision, responsibility, and adrenaline.

As we took off, I felt a spark ignite in me. I wasn't just watching a pilot at work — I was part of the flight. The level of focus and skill involved, the thrill of handling a machine so complex, and the beauty of simulated flight paths unfolding in real time completely captivated me.

That one session changed everything. Within weeks, I signed up for flight school, ready to turn that passion into a real pursuit. Now, every time I step into a training aircraft, I think back to that simulator and the excitement I felt. It was more than a fun experience

-- It was the moment I discovered my new career

STUDENT TESTIMONIALS

”

"I've always enjoyed aviation as an observer so my wife got me a great birthday present...a 45 mins introductory flight with Aamro in Lantana, FL. It was an awesome experience and I enjoyed my time flying over the Atlantic and westward to the wetlands. My pilot was outstanding and very patient with me! I recommend Aamro Aviation!"

--MARC

”

"Amazing flight school. Achieved private, instrument and commercial licenses. A more hands on one on one experience with dedicated CFI's compared to Pilot-mill schools. Ryan, Naomy, Jake, and Nia have been wonderful CFIs to work with. Also Alberto at the front desk is super helpful. Not to mention new 2023 piper archer aircrafts with g1000. Highly recommend for flight training."

THE TECNAM P2006T: CUTTING-EDGE MULTI-ENGINE TRAINING

The P2006T isn't just an aircraft --- it's the future of multi-engine training

The Tecnam P2006T represents the latest in twin-engine aircraft design, featuring dual Rotax 912S3 engines that deliver 100 hp each with exceptional fuel efficiency. This modern aircraft integrates seamlessly into our training fleet, offering students and pilots a reliable platform for multi-engine operations and general aviation missions.

Key Features:

Advanced Avionics: Garmin G1000 NXi glass cockpit system provides comprehensive flight data and enhanced situational awareness	Economic Operation: One of the most cost-effective multi-engine trainers in its class with superior fuel efficiency	Optimal Performance: Maximum cruise speed of 146 knots ideal for training scenarios and cross-country flights	Proven Reliability: Twin Rotax engine configuration ensures dependable operation and reduced maintenance costs
--	---	---	--

These outstanding aircraft enhance our ability to deliver world-class multi-engine training while maintaining Aamro Aviation's commitment to safety, reliability, and excellence.

COURSE SPOTLIGHT

FEATURED COURSE: CERTIFIED FLIGHT INSTRUCTOR (CFI)

Transform from Student to Teacher in 4-8 Weeks

The Certified Flight Instructor course emphasizes developing teaching skills and applying knowledge gained up to the CPL level. As a flight instructor, you'll be qualified to teach both Private Pilot and Commercial Pilot students.

Program Highlights	Eligibility
<ul style="list-style-type: none">• Duration: 4-8 weeks• Ground Training: 15 hours of instruction• Flight Training: 5-10 hours	<ul style="list-style-type: none">• Minimum age: 18 years• Minimum 3rd class medical certificate• Must hold Commercial Pilot License (CPL)• English language proficiency• Pass FOI & FIA exams

What You'll Learn

The course focuses on transforming your aviation knowledge into effective teaching skills, preparing you to guide the next generation of pilots through their training journey.

NEW LOCATION UPDATE

F45 LOCATION UPDATE

We're excited to share that Aamro Aviation has expanded its facilities at the F45 (North Palm Beach County) location by acquiring the adjacent suite. This strategic move allows us to enhance the student and instructor experience while supporting continued growth in operations.

Expanded Classroom Capacity: We've added additional classroom space, allowing us to accommodate more students and run multiple sessions simultaneously.

Upgraded Reception and Dispatch Area: The front area has been redesigned into a larger, more welcoming reception and a streamlined flight dispatch section for improved scheduling and student support.

Dedicated Instructor Lounge: A newly introduced break room and meeting space just for our instructors — offering them a place to prepare, relax, and collaborate.

Personal Storage for Instructors: Flight instructors now have access to locker-style storage for their personal belongings, making their workday more organized and efficient.

More Seating & Study Space: Additional seating throughout the facility provides students with more comfortable areas for study, waiting, or post-flight debriefs.

New Vending Machine: We've installed a convenient vending machine for snacks and beverages, ensuring students and staff have easy access to refreshments during their time at the facility.

This expansion reflects our ongoing commitment to investing in quality infrastructure for both our students and staff. We look forward to welcoming you to the upgraded F45 facility!

LIBERTY UNIVERSITY PARTNERSHIP

We're proud to announce our partnership with Liberty University's School of Aeronautics! Liberty University will be sponsoring students who enroll in our Part 141 flight training program while pursuing their aviation degree.

About Liberty University's Program: Liberty University is a private institution offering comprehensive aviation education across the United States. Students can earn their college degree while completing flight training at approved Flight Training Affiliate (FTA) locations like ours. What makes Liberty's program particularly valuable is their FAA-approved curriculum that allows graduates to qualify for Restricted ATP licenses at 1,000 hours instead of the standard 1,500-hour requirement.

Program Benefits:

- Part 141 flight training curriculum
 - 4-year Bachelor's degree in Aeronautics
 - Restricted ATP eligibility after completing 66 college credits in their approved program
 - Sponsored training for qualified students
-
